March 25, 2019

Dear Gardeners:

West Vincent Township is planning to install a permanent water source through an Aqua connection at the community garden later this year. As part of the process the Township is reaching out to our gardeners to determine if there is interest in having this permanent water source installed. Please note as this project requires capital funding, a condition of the Township's planned investment requires our gardeners to accept an additional surcharge on your plot registration in 2019, to be assessed after the Township installs the new system. We anticipate the system will be installed this summer. The Township plans to implement this surcharge for a period of five years to help offset the cost of this improvement. If there is not enough interest this year, the Township will re-evaluate the project.

If you are interested in a having a permanent water source installed at the garden, and willing to commit to the surcharge in 2019, please indicate with an X below and deliver this form to the Township office with your registration fee.

If you are not interested in having a permanent water source installed at the garden with the condition as described above, please indicate with an X below and deliver this form to the Township office with your registration fee. We appreciate your cooperation in this regard.

2019 Garden Plot Fees (To be paid at Registration) 2019 Garden Plot Surcharge (To be paid when water connection is installed.)

\$25.00 for a 10 x 20 Plot	Additional \$20.00
\$35.00 for a 20 x 20 Plot	Additional \$25.00
\$45.00 for a raised bed	Additional \$20.00

_____ I approve of the above described condition of installing a permanent water source at the community garden and accept the surcharge fee to be assessed at a later date.

_____ I do not approve of the above described condition of installing a permanent water source at the community garden and do not accept the surcharge fee to be assessed at a later date.
