

**Birds & Bees Garden Club –
Garden Demonstration - the "Lasagna Method" –
*As posted in November 2021 on EAC home page of township website***

Our garden demonstration on how to prepare a new spring flower bed using the "lasagna method", held on Saturday, October 23 was a great success! Many new people were met, we felt the energy growing, and we now have a new flower bed in Andrew Evans Park!

The next task for spring flower preparation will be to grow the plants for our Township bed and our Pollinator Pitstop Program members.

We have enlisted the help of our local Girl Scout troops and possibly, some West Vincent Elementary School gardeners-in-training to help in the planting.

A good time for planting the seeds that require cold stratification would be the end of January.

Please contact Donna Delany (d.delany@comcast.net) if you would like to be part of the planning process for the seed growing and/or if you have experience growing native plants from seed.
